3M™ High Intensity Prismatic Reflective Sheeting Series 3930

Details

Durable - tougher topcoat aids against scuffs and scratches Vivid daytime colors provide 24-hour performance with increased daytime visibility Meets multiple specifications Performance warranted for up to 10 years

Typical properties

Adhesive Features: Solvent-free
Adhesive Type: Pressure-sensitive
Availability: Non-Standard, Standard
Construction: Microprismatic, Truncated Prismatic
Factory ISO Certification: No ISO Certification information available
Imaging Method: Digital Print, Overlay/Electronic Cut, Screenprint
Liner: Yes
Mark: Single European Mark (SEM)
Performance Features: Retroreflective
Performance Level: High Intensity Prismatic
Product Code: 3935,3937,3939,3930,3931,3932,3934
Product Color: Blue, Brown, Green, Orange, Red, White, Yellow
Product Series: 3930
Product Usage: Commercial signs, Construction work zones, Non-critical Traffic Signs, Non-regulated Signs, Regulated Rigid Traffic Signs, Traffic Signs
Reflective Technology: Microprismatic, Truncated Prismatic
Service Life: 10 Year

3M™ Ultra-Clear Solar Film

Details

Uses 3M Multi-layer Optical Film technology to reflect infrared heat helping to reduce cabin temperature and increasing passenger comfort. Film is inserted inside laminated glass for use in windshields, sunroofs, backlites, and sidelites. Non-metallic construction won't interfere with electronic signals such as mobile phones or GPS signals. Neutral color to maintain desired glass aesthetics with little reduction in visible light transmission. Compatible with PVB and other laminated glass interlayer adhesives and conformable for curved glass applications.

Typical properties

Application: Cooling, Enhancing Solar Performance, Heat Rejecting, IR Blocking, IR Reflecting, Increasing EV Range, Infrared Solar Energy Reflecting, Solar Energy Blocking, Solar Heat Reducing, Visible Light Transmitting
Factory ISO Certification: No ISO Certification information available
Product Usage: Sidelites, Sunroofs, Vehicles, Windows, Windshields

3M™ Scotchlite™ Reflective Material 5687 Series

Details

Compliant brightness designed for enhancing visibility of wearer in low light and nighttime conditions Certified to the current edition of various NFPA standards as components for fire fighting clothing and equipment when applied to compliant fabrics such as certain aramids, modacrylics, and FR treated cottons Fluorescent properties help ensure high visibility in daylight, dawn, and dusk Wearer comfort enhanced by lighter, more breathable, and more flexible design Transfer film bonds seamlessly with fabrics without the need for stitching to create a smooth, snag-resistant design Heat transfer application

Typical properties

Adhesive: Heat Activated Polyester
Attachment Type: Heat Transfer
Backing Material: Flame Retardant Polymer
Certified Performance Required: CGSB, NFPA
Daytime Color: Yellow/Silver
Flame Resistant: Yes
Initial Average RA: >400
Product Series: 5687 NFPA
Recommended Application: Flame Resistant, Heat Transfer, Segmented
Recommended Industry: First Responders
Reflective Color: White
Technology: Beaded
Wash Method: Home Wash

Details

Used to conform large areas of film onto a textured surface Useful for conforming heated film to mortar joints and inside corners Conveniently stored together in one sturdy

Typical properties

Brands: 3M™

Factory ISO Certification: No ISO Certification information available

Product Type: Roller

3M™ Image Quality Polarizer (IQP)

3M Product Number IQP 3M ID B5005356008

Details

Enhance picture quality and contrast Increase brightness over a wide viewing angle Enable thinner, lighter-weight designs Boost efficiency by as much as 30% Very low transmission leak state Recycle light that would otherwise be wasted Save battery life Reduce thermal load

Typical properties

Application: VR Head-Mounted Display Assembly
eClass 14 Classification Group: 24210501

3M™ Diamond Grade™ Fluorescent Work Zone Digital Sheeting Series 3924SUDS

Details

Designed for the production of traffic control signs for the work zone Fluorescent sheetings have higher visibility than non-fluorescent sheetings in the daytime and are especially visible at dawn, dusk, during poor daylight and in adverse weather conditions Compatible with 3M qualified Digital Printer solutions

Typical properties

Brands: Diamond Grade™

3M™ Advanced Polarizing Film (APF)

3M Product Number APF 3M ID B5005047084

Details

Increase brightness over a wide viewing angle Boost efficiency by as much as 30% Enable thinner, lighter-weight designs Enhance picture quality Save battery life Recycle light that would otherwise be wasted Hard-coat layer protects against impressions from other backlight components Reduce thermal load More environmentally robust versus loose film

Typical properties

Application: IoT Device Assembly, Laptop Assembly, Smartphone Assembly, Tablet Assembly, VR Head-Mounted Display Assembly
eClass 14 Classification Group: 24210501

3M™ DI-NOC™ Architectural Finishes Whiteboard

Details

Reimagine virtually any surface as a writeable, erasable canvas Quick and easy installation with less downtime, noise and disruption More cost effective versus traditional whiteboard installation Designed for use in interior environments Easy to remove dry-erase marker residue Abrasion, stain and chemical resistant Compatible with most standard dry-erase markers and erasers

Typical properties

3M™ Sensor Camouflage Film (SCF)

3M Product Number SCF 3M ID B5005424018

Details

More cabin design flexibility Improve driver safety Improve signal-to-noise ratio
Increase manufacturing flexibility Place driver monitoring system (DMS) sensors
where they'll be most effective Transmit infrared (IR) light Minimize solar
radiation

Typical properties

Application: Driver Monitoring System Assembly, IoT Device Assembly, Large-
Area Sensing/Imaging Device Assembly, Sensor Assembly
eClass 14 Classification Group: 24210501

3M™ Plastic Sheeting

Details

High-density, tear-resistant, durable polyethylene sheeting/film masks car from paint overspray and other contaminants during repairs 3M engineered static cling makes the film easy to handle so one person can quickly cover the vehicle The film is easy to cut so the required area can be removed with maximum speed and accuracy Treated to ensure maximum overspray adhesion so flecks don't contaminate fresh paint Center printing helps with alignment Choose from 12 ft / 4m width for cars and 16 ft / 5 m width for wider vehicles Dispenses vertically or horizontally from 3M™ Overspray Protective Sheeting Masker 06780 (sold separately) Can be converted into shapes and configurations to fit OEM and Tier application needs Global portfolio, technical expertise help ensure you choose the right solution to meet your goals

Typical properties

Application: Masking Solution, Masking for Painting, Overspray Protection, Paint Masking, Paint Preparation, Paint Preparation Masking, Protect From Paint Overspray

ScotchBlue™ TAPE + PLASTIC Dispenser - 48"

3M ID CBGNAW011359 UPC 00051141340647

Details

PERFORMANCE: Dispenser combines plastic sheeting and ScotchBlue™ Sharp Lines Painter's Tape into one product allowing for quicker and easier application than applying film and tape individually **USE-ON SURFACES:** Designed for use on multiple surfaces such as smooth or lightly textured walls, trim, baseboards, tile and glass **PROTECTS:** Against accidental paint splatter **EASY TO USE:** Easy to dispense, cut, apply and readjust if needed **STATIC CLING:** Helps plastic stay in place on walls, counters, cabinets, and other surfaces **WIDTHS:** Plastic unfolds to 24" or 48" wide **PAINT LINES:** Tape features Edge-Lock™ Technology that seals out paint to deliver sharp paint lines **DAYS CLEAN REMOVAL:** 21-day interior and exterior clean removal leaves behind no damage or sticky residue **ADHESIVE LEVEL:** Medium UV and sunlight resistant **PACK OUT:** 1 Roll/Pack **APPLICATION TIPS:** For great paint results make sure the surface is clean, dry, and dust-free so that the tape sticks properly. Next apply the tape onto the surface. And lastly, let the tape set for about 30 to 60 minutes before painting **REMOVAL TIPS:** Wait until the paint is dry to the touch before removing the tape. Lift it up by slowly pulling it back on itself, then removing at a 45-degree angle

3M™ Paint Replacement Tape 5004 46320, Light Gray, Roll, Configurable

Part Number 5004 3M Product Number 5004 3M ID 7100012139

Details

Fluoropolymer film is inherently resistant to chemicals and environmental agents to provide excellent substrate protection and long-term color stability Acrylic adhesive provides high initial adhesion and long-term holding power to a variety of substrates Meets industry flame resistance requirements for aircraft interiors, and has successfully been used in general aviation, commercial and military aircraft applications Usable for surface protection and paint replacement applications Conforms to features with irregular surfaces such as rivet heads, doublers and welded seams

Typical properties

Application: Paint Replacement

Brands: 3M™

Factory ISO Certification: No ISO Certification information available

Product Color: Light Gray

eClass 14 Classification Group: 35030590

3M™ Blackout Film F577

3M Product Number F577 3M ID B40071877

Details

OEM-approved conformable PVC film used to provide blackout appearance around automotive side glass A substitute for paint in areas of the automotive body that are expensive or difficult to paint Helps eliminate time and expense of paint processes and related steps Textured matte black surface is an effective design tool for brand differentiation and visual impact Modified acrylic adhesive delivers strong final adhesion to automotive surfaces Patterned liner creates air-release microchannels in adhesive to reduce bubbling Die-cut, pre-masked parts and simple dispensing tools help reduce production costs

Typical properties

Adhesive Features: Air Release
Film Thickness (Imperial): 7.9 mil
Film Thickness (Metric): 200.66 Micron
Texture: Textured

3M™ Interior Trim Film - Relief Metal Graphical Series

3M Product Number RMG 3M ID B40069757

Details

Creates patterned or printed metallic appearance for interior automotive trim parts Fine relief creates slightly raised “touchable” texture that holds even after elongation Film technology incorporates real metal for authentic look and feel Excellent elongation properties – film wraps around components for additional protection Dual Vacuum Thermoforming (DVT) application helps ensure consistency across complex shapes Versatile color and gloss tuning for a variety of design objectives Finish can be changed easily according to the trim levels to meet regional needs Enables easy tuning of color and gloss for a wide variety of colors Textures and colors can be combined to create a wide variety of finishes Custom finishes are developed jointly between 3M and OEM design studios for specific models

Typical properties

Interior/Exterior: Interior

3M™ Polyurethane Protective Boot SJ8681HS

Details

High strength acrylic adhesive enables aggressive bond to protect rotor blades and air intake surfaces Protects against erosion caused by Foreign Object Debris (FOD) such as rain and sand Transparent and colored versions, matte and glossy finishings available Custom molded for precise fit Can be used to protect radomes with virtually no reduction in transmissivity Helps prevent surface damage and delamination Reliable protection for leading edge metal and composite surfaces

Typical properties

Aircraft Location: 300 gal Centerline Fuel Tank, 370 gal External Fuel Tank (Wing), 600 Gal External Fuel Tank (Wing), ALR-69 Radome, AN/ALQ-188 (v)3 & (v)4 Forward Lens, BAE Systems Canopy Sill (Right), BAE Systems Leading Edge Flap Fairing (Left or Right), BAE Systems Midband Lbi Bugeye Fairing (Left), BAE Systems Midband Lbi Bugeye Fairing (Right), BAE Systems RFCM Rain Erosion, Datron/Transco Forward Down Antenna, Fairing Air Intake, Fairing Air Intake (Left), Fin, Metric Systems S-band Antenna Radome, Radome, Rear Air Inlet, Threat Warning System
Application: Erosion Protection, Surface Protection
Compatible Manufacturer: Boeing, Fairchild, General Dynamics, Lockheed, McDonnell Douglas, Rockwell, SAAB, US Air Force
Compatible Platform: A-10, ALQ-188, Air Launched Cruise Missile (ALCM), B-1, F-15, F-16, Gripen JAS 39C/D, Gripen JAS 39E/F, POD

Durable, nearly invisible protection against scratches, chips, tar, fluids and UV radiation Excellent for protecting automotive paint and other vulnerable surfaces Polyurethane film and protective clearcoat resist chipping, scratching, staining and discoloration 2 mil pressure-sensitive adhesive makes for fast, efficient application without curing Pre-masked and die-cut parts make for more efficient application

Typical properties

Film Thickness (Imperial): 8 mil
Film Thickness (Metric): 203.2 micron
eClass 14 Classification Group: 35030590

3M™ Polyurethane Protective Boot SJ8663

Details

Protects against erosion caused by Foreign Object Debris (FOD) such as rain and sand UV stable transparent polyurethane material holds its clarity and will not yellow over time (matte black color also available) Can be used to protect radomes with virtually no reduction in transmissivity Custom molded for precise fit Helps prevent surface damage and delamination Reliable protection for leading edge metal and composite surfaces

Typical properties

Aircraft Location: Horizontal Stabilizer (Left), Horizontal Stabilizer (Right), Nose Radome, Radome, Wheel Pod (Right)

Application: Erosion Protection, Surface Protection

Brands: 3M™

Compatible Manufacturer: BAE, Boeing, Bombardier, Fairchild, McDonnell Douglas

Compatible Platform: 146, 717, A-10, CRJ-700, DC-10, DC-9, MD-11, MD-80

Factory ISO Certification: No ISO Certification information available

Product Color: Black, Transparent

Surface Finish: Glossy, Matte

eClass 14 Classification Group: 46040400

Dimensions and Classifications

Overall Thickness (Imperial): 0.014 in, 0.018 in

3M™ Diamond Grade™ DG³ Pre-Striped Barricade Sheeting Series 444/446

Details

3M™ Diamond Grade™ DG³ Pre-Striped Barricade Sheeting Series 444/446 is a super high efficiency, full-cube retroreflective sheeting Provides long lasting durability with impact and gouge resistance Exceeds ASTM D4956 Type XI

Typical properties

Adhesive Features: Solvent-free
Adhesive Type: Pressure-sensitive
Availability: Non-Standard
Construction: Microprismatic
Factory ISO Certification: No ISO Certification information available
Imaging Method: Digital Print, Overlay/Electronic Cut, Screenprint
Industries: Automotive, Transportation
Liner: Yes
Performance Level: Diamond Grade
Performance Tier: DG3
Product Code: 444L,446R,444R,446L
Product Color: Orange, White
Product Series: 444/446
Product Usage: Barricades, Barriers, Channelizers, Construction work zones, Drums, Traffic control devices
Reflective Technology: Full-cube Prismatic, Microprismatic
Specifications Met: ASTM D4956 Type XI CWZ
Substrate: Aluminum, Plastic, Wood
eClass 14 Classification Group: 35030590

Dimensions and Classifications

Overall Length (Imperial): 50 yd, 100 yd
Overall Length (Metric): 45.72 m, 91.44 m
Overall Width (Imperial): 4 in, 7.75 in, 8 in, 12 in, 48 in
Overall Width (Metric): 101.6 mm, 152.4 mm, 196.85 mm, 203.2 mm, 304.8 mm

3M™ Scotchlite™ Reflective Material 5535 Series

Details

Compliant brightness designed for enhancing visibility of wearer in low light and nighttime conditions 32-angle table brightness compliance to help keep wearers visible from many angles Wearer comfort enhanced by lighter, more breathable, and more flexible design Transfer film bonds seamlessly with fabrics without the need for stitching to create a smooth, snag-resistant design Certified to major flame-resistance standards

Typical properties

Attachment Type: Heat Transfer
Backing Material: Flame Retardant Polymer
Certified Performance Required: ANSI 107-2015, CGSB, CSA Z95-2015, NFPA
Daytime Color: Silver
Dry-Cleaning Cycles at ANSI Certified Standards: 50, See Manufacturer Product Instructions
Dry-Cleaning Cycles per ANSI 107-2015: 50
Flame Resistant: Yes
Home Wash Cycles 60°C (140°F) at ANSI Certified Standards: 65
Initial Average RA: >330
Product Series: 5535, 5535M
Recommended Application: Flame Resistant, Heat Transfer, Industrial Wash, Segmented
Recommended Industry: Construction, Design & Construction, First Responders
Reflective Color: White
Technology: Beaded
Wash Cycles per ANSI 107-2015: 65
Wash Method: Home Wash

Dimensions and Classifications

Overall Length (Imperial): 218.72 yd
Overall Length (Metric): 200 m

3M™ Scotchlite™ Reflective Material 9720 Series

Details

3M™ Scotchlite™ Reflective Material is designed for enhancing visibility in low light and nighttime conditions Certified to various global high visibility standards such as ANSI/ISEA 107 Suitable for applications that will be exposed to industrial laundering Heat transfer application

Typical properties

Adhesive: Heat Activated Polyester
Attachment Type: Heat Transfer
Backing: Heat Activated Polyester
Backing Material: Polymer
Certified Performance Required: ANSI 107-2015, CSA Z95-2015, Oeko-Tex
Daytime Color: Silver
Dry-Cleaning Cycles at ANSI Certified Standards: 50
Dry-Cleaning Cycles per ANSI 107-2015: 50
Flame Resistant: No
Home Wash Cycles 60°C (140°F) at ANSI Certified Standards: 50
Initial Average RA: 500
Product Series: 9720
Recommended Application: Heat Transfer, Industrial Wash
Recommended Industry: Construction, Mining, Oil & Gas, Utilities
Reflective Color: White
Technology: Beaded
Wash Cycles per ANSI 107-2015: 50
Wash Method: Home Wash, Industrial Wash

Dimensions and Classifications

3M™ Scotchlite™ Reflective Material C420, Silver Footwear Film, Roll, Config

3M Product Number C420 3M ID 7100001577

Details

3M™ Scotchlite™ Reflective Material is designed for enhancing visibility in low light and nighttime conditions Not certified to occupational high-visibility garment standards Available as transfer films, footwear films, and a fabric Does not have an adhesive

Typical properties

Adhesive: None
Attachment Type: None
Brands: Scotchlite™
Certified Performance Required: Oeko-Tex
Daytime Color: Silver
Flame Resistant: No
Initial Average RA: 500
Technology: Beaded
Wash Method: Not Washable

3M™ Automotive Window Film Color Stable Series

Details

Available in multiple tint levels that block up to 93% of visible light, which means more privacy for you, your family and your valuables 3M nano-carbon polyester provides a deep, rich and long-lasting shade that won't turn purple Offers an incredible look that rivals tinted factory glass Metal-free design won't interfere with electronics, GPS, satellite radio or mobile devices, including 5G

Typical properties

Application: Cooling, Fade Reducing, Glare Reducing, Heat Rejecting, IR Blocking, Light Blocking, Solar Energy Blocking, Solar Heat Reducing, UV Rejecting, Visible Light Transmitting

Factory ISO Certification: No ISO Certification information available

Product Usage: Vehicles

Visible Light Transmittance: 5 %, 20 %, 35 %, 50 %

3M™ Diamond Grade™ DG³ Fluorescent Reflective Sheeting Series 4080

Details

3M™ Diamond Grade™ DG³ Fluorescent Reflective Sheeting Series 4080 offers superior reflectivity at short and long distances, fluorescent for added visibility during dawn, daytime, dusk and inclement weather Meets today's highest published performance specifications 3M's best solutions for sign positions outside of primary headlight illumination One of the brightest durable sheeting for cost-efficient guidance Offers excellent life-cycle value Short, medium and long sight distances Disadvantaged sign placement locations such as overhead or left shoulder Available in fluorescent orange, fluorescent yellow, and fluorescent green

Typical properties

Adhesive Features: Solvent-free
Adhesive Type: Pressure-sensitive
Availability: Non-Standard, Standard
Construction: Microprismatic
Factory ISO Certification: No ISO Certification information available
Imaging Method: Digital Print, Overlay/Electronic Cut, Screenprint
Liner: Yes
Performance Level: Diamond Grade
Performance Tier: DG3
Product Code: 4084,4081,4083
Product Color: Fluorescent Orange, Fluorescent Yellow, Fluorescent Yellow-green
Product Series: 4080
Product Usage: Construction work zones, Regulated Rigid Traffic Signs
Reflective Technology: Full-cube Prismatic, Microprismatic
Service Life: 10 Year
Specifications Met: ASTM D4956 Type IX, ASTM D4956 Type XI, ASTM D4956 Type XI CWZ
Substrate: Aluminum, Plywood

3M™ Interior Trim Film - Relief Color Graphical Series

3M ID B40069759

Details

Creates textured or printed patterns for interior automotive trim parts Fine relief creates slightly raised “touchable” texture that holds even after elongation Excellent elongating properties – film wraps around components for additional protection Dual Vacuum Thermoforming (DVT) application helps ensure consistency across complex shapes Easily change the finish to allow different trim levels to meet regional needs Enables easy tuning of color and gloss for a wide variety of colors Textures and colors can be combined to create a wide variety of finishes Custom finishes are developed jointly between 3M and OEM design studios for specific models

Typical properties

3M™ Blackout Film FUS1007Q

3M Product Number FUS1007Q 3M ID B40069482

Details

OEM-approved conformable PVC film used to provide blackout appearance around automotive side glass A substitute for paint in areas of the automotive body that are expensive or difficult to paint Help eliminate time and expense of paint processes and related steps Low-gloss black surface is an effective design tool for brand differentiation and visual impact Modified acrylic adhesive delivers strong final adhesion and high shear performance Patterned liner creates air-release microchannels in adhesive to reduce bubbling Die-cut, pre-masked parts and simple dispensing help reduce production costs

Typical properties

Adhesive Features: Air Release
Brands: 3M™
Film Thickness (Imperial): 5 mil
Film Thickness (Metric): 127 Micron

Product Usage: Ceilings, Doors, Elevators, Furniture, Interior, Panels, Partitions, Walls

Removability: Not Removable

Specifications Met: CA Specification 01350, CSI Division 09, Class A - ASTM E84 Fire Classification, Class B - Fire Classification, Flammability & IMO Standards

Surface Finish: Glossy, High Gloss, Matte

Wood Species: Alder, Anigre, Ash, Beech, Birch, Birdseye Maple, Black Limba, Bombay Black Wood, Bubinga, Camphor, Cherry, Chestnut, Design Wood, Ebony, Elm, Hard Maple, Hickory, Hinoki, Ipe, Japanese Bigleaf Magnolia, Japanese Nutmeg, Koa, Mahogany, Maple, Oak, Olive, Padauk, Parudao, Paulownia, Pear, Pine/Larch, Plum, Primavera, Redwood, Rosewood, Silver Heart, Slimline, Sucupira, Sugi/Cedar, Sycamore, Teak, Tineo, Walnut, Wenge, Yew, Zebra Wood

Wood Tone: Dark, Light, Medium, Metallic, Rustic

Year of Introduction: 2020, 2021, 2024, Pre-2020

eClass 14 Classification Group: 35030590

Dimensions and Classifications

Overall Length (Imperial): 27.34 yd, 54.681 yd, 82 ft, 164 ft

Overall Length (Metric): 25 m, 50 m

Overall Width (Imperial): 4 ft, 48 in, 48.031 in

Overall Width (Metric): 1220 mm

3M™ Engineer Grade Prismatic Reflective Sheeting Series 3400

Details

3M™ Engineer Grade Prismatic Reflective Sheeting Series 3400 Series exceeds reflectivity within the engineer grade class Robust design aids hand application to large substrate sheets Reliable performance of polycarbonate cube corners Meets and exceeds ASTM D4956 Type I specification Better daytime and nighttime brightness than engineer grade with glass bead optics Performance life of seven years

Typical properties

Adhesive Type: Pressure-sensitive
Availability: Custom, Standard
Construction: Microprismatic
Factory ISO Certification: No ISO Certification information available
Imaging Method: Digital Print, Overlay/Electronic Cut, Screenprint
Liner: Yes
Mark: EGP
Performance Level: Engineer Grade
Performance Tier: Prismatic
Product Code: 3427,3437,3431,3430
Product Color: Green, White, Yellow
Product Series: 3400
Product Usage: Commercial signs, Non-critical Traffic Signs, Regulated Rigid Traffic Signs
Reflective Technology: Microprismatic
Specifications Met: AS/NZS 1906.1 Class 2, ASTM D4956 Type I, EN 12899-1:2007 Type RA1 / ETA RA1
Substrate: Aluminum
eClass 14 Classification Group: 35030590

Dimensions and Classifications

3M™ Diamond Grade™ Roll Up Sign Sheeting RS20

Details

Diamond Grade™ optics provide superior brightness and angularity Portable for use in temporary work zones, utility work areas and emergency traffic situations
Higher nighttime sign brightness than sheeting that uses glass bead lenses
Exceeds ASTM D4956 Type VI Maintain high levels of sign communication with instant, temporary traffic control devices Long lasting fluorescent color

Typical properties

Availability: Non-Standard
Brands: Diamond Grade™
Construction: Flexible, Microprismatic
Factory ISO Certification: No ISO Certification information available
Imaging Method: Digital Print, Overlay/Electronic Cut, Screenprint
Performance Level: Diamond Grade
Product Color: Fluorescent Orange, White
Product Series: RS30
Product Usage: Construction work zones, Traffic control devices
Reflective Technology: Microprismatic
Specifications Met: ASTM D4956 Type VI CWZ

ScotchBlue™ TAPE + PLASTIC Dispenser - 24"

3M ID CBGNAW011358 UPC 00051141937496

Details

Ideal for use on baseboards, trim, metal and glass surfaces Dispenser combines ScotchBlue™ Painter's Tape and plastic into one product allowing for quicker, easier application than applying film and tape individually Plastic sheeting helps protect against accidental paint splatter to help keep your surfaces clean Easy to dispense, cut, apply and readjust if needed Static cling helps plastic stay in place Tape features Advanced Edge-Lock™ Paint Line Protector for edge-to-edge protection to help with paint out and reveal super sharp paint lines Removes cleanly up to 14 days with no sticky residue Plastic unfolds to 24", 48" or 72" wide Dispenser size available in 24" and 48" Medium adhesion level removes easily, while protecting your surfaces Durable, UV-resistant materials For great paint results make sure the surface is clean, dry and dust-free so that the tape sticks properly. Next apply tape onto the surface while pressing down as you go. Then secure the tape by pressing down on it firmly with a smooth edge. And lastly, let the tape set for about 30 to 60 minutes before painting Wait until the paint is dry to the touch before removing the tape. Lift it up by slowly pulling it back on itself, then removing at a 45 degree angle

Ideal for use on baseboards, trim, metal, painted walls, drywall, glass, vinyl molding and more Combined ScotchBlue™ Multi-Surface Painter's Tape and plastic film into one product allows for quicker, easier masking than applying film and tape individually to protect against accidental splatter Easy to dispense, cut, apply and readjust if needed Static cling helps plastic stay in place Tape features Advanced Edge-Lock™ Paint Line Protector for super sharp paint lines Removes cleanly up to 14 days with no sticky residue Plastic unfolds to 24", 48" or 72" wide Dispenser size available in 24" and 48" Medium adhesion level removes easily, while protecting your surfaces Compatible with the ScotchBlue™ TAPE + PLASTIC Dispenser For great paint results make sure the surface is clean, dry and dust-free so that the tape sticks properly. Next apply tape onto the surface while pressing down as you go. Then secure the tape by pressing down on it firmly with a smooth edge. And lastly, let the tape set for about 30 to 60 minutes before painting Wait until the paint is dry to the touch before removing the tape. Lift it up by slowly pulling it back on itself, then removing at a 45 degree angle

3M™ High Intensity Prismatic Reflective Digital Sheeting 3930UDS Series

Details

When used as part of 3M's system of matched components for digitally printed signing, finished sign faces using 3M™ High Intensity Prismatic Digital Reflective Sheeting Series 3930UDS are backed by the 3M™MCS™ Warranties 3M™ High Intensity Prismatic Reflective Digital Sheeting Series 3930UDS, as manufactured by 3M, meets the stringent retroreflective requirements described in the ASTM D4956 standard for Type IV retroreflective sheeting. When applied to properly prepared sign substrates, the Sheeting provides long-term reflectivity and durability for multiple traffic sign applications. Compatible with 3M qualified Digital Printer solutions.

Typical properties

3M™ Wrap Film Series 2080

Details

3M™ Wrap Film Series 2080 is developed specifically for vehicle personalization from accents to full vehicle wraps. Optimized adhesive provides an exceptional installation experience*. Adhesive features updated 3M™ Comply™ technology with non-visible air release channels for bubble-free application*. 3M™ Controltac™ technology features reduced initial tack for excellent repositionability*. Nearly 100 colors, patterns and textures include gloss and high gloss. Gloss and high gloss colors feature a protective film layer which reduces surface impressions and scratches. 60-inch-wide rolls allow for wrapping almost any vehicle section without seams. Comprehensive 3M™ MCS™-backed warranty*. Approved for use with 3M™ Knifeless Tapes.
