3M™ Victory Series™ Low Profile Bracket System

3M ID B5005051042

Details

A unique rhomboid design with a flatter, compounded radius accommodates naturally occurring variation in tooth surfaces. This design assures three point contact for increased tooth adaptation
Mesial-distal dimension is not compromised even though the bracket has a low profile. You maintain the rotational control you need to get the results you desire
Delivers uncompromising levels of control throughout the treatment process, assuring consistent patient outcomes with the use of the MBT™ System
Positioning is made easier and more accurate because of their rhomboid shape that follows the natural vertical line of the tooth
Ample under tie-wing area is integral to the design so you do not have to sacrifice bracket size for easy ligation
Smooth radius surface for enhanced patient comfort
Torque in Base for level slot line-up
Uncompromising under tie-wing area for ease of ligation
Color-coded quadrant ID system
Vertical scribe line for more accurate bracket placement
Micro-etch base surface and anatomical contouring

3M™ Transbond™ Plus Self Etching Primer

Details

One-step etch and prime system
High performance in moist or dry environments
Each single use foil pack contains enough primer for one complete arch
Added patient comfort because of the elimination of the etchant rinsing process
Exclusive delivery system is easily mixed by hand or used with the 3M™ Transbond™ Easy Roller
Use with moisture-tolerant light cure adhesives for good bond strength
A shorter treatment window saves you valuable time and builds greater productivity for your practice (1)
Patient comfort is increased because of the elimination of the etchant rinsing process
Performs both etching and penetration of monomers into the demineralized enamel, in one step, resulting in less enamel loss when compared to traditional etching
